

Disclaimer: Drawings produced by DANOSA UK should be considered non-scalable and for illustrative purposes only. Issued design principals form instructions for the installation of DANOSA UK materials only and should be considered as part of an overall design rather than in isolation. Product 'Technical Datasheets' are available for all DANOSA UK products and should be consulted in conjunction with all issued DANOSA UK installation instructions. Drawings are subject to copyright and should not be reproduced without permission.

Drawing Notes:

The structural substrates should be primed in accordance with the project specification. Substrates shown in this drawing are for illustrative purposes only.

Note A:

Where a full bond to the substrate is required, or where ESTERDAN 30 P ELAST SEMIADHESVIO is used as the underlay, GLASDAN 800 PERFORADO does not form part of the system.

Note B:

Timber bearers should be laid so that they do not inhibit free drainage of the roof system. If this cannot be avoided, then the bearers must sit on suitable support pads to allow free drainage underneath.
